FUZZY NON-HOMOGENEOUS DATA ANALYSIS MODEL

W.B. Vasantha Kandasamy and T. Johnson

In this paper we analyze the raw data obtained from HIV/AIDS patients using a new model called Fuzzy Non-Homogenous Data Analysis model (FNHDA). We divide the paper into two sections. In the first section we construct the new FNHDA model. In section two we describe the problem and solve the problem using this model. Conclusion based on our study is given.
